

TOWN OF RED HOOK
RESOLUTION NO. 2 DATED JANUARY 28, 2015
OPPOSING BUILDING OF THE PILGRIM PIPELINE

WHEREAS, Pilgrim Pipeline Company is proposing to build a bi-directional pipeline in close proximity to the NY State Thruway, through Rockland, Orange, Ulster, Greene, and Albany counties that would transport crude oil and refined petroleum products between Albany, New York and Linden, New Jersey; and

WHEREAS, the pipeline will carry oil from the Bakken Shale region of North Dakota extracted through a process of hydraulic fracturing, or "fracking," which has been found to contaminate clean water resources, create toxic air emissions and radioactive waste, and release large quantities of methane gas into the atmosphere; and

WHEREAS, data collected by the Capline Pipeline in Louisiana, which tested crude from 86 locations worldwide, indicates that crude oil from Bakken Shale has a far higher vapor pressure than crude from dozens of other locations, making it much more likely to throw off combustible gases; and

WHEREAS, the U.S. Department of Transportation's Pipeline and Hazardous Materials Safety Administration (PHMSA) issued a safety alert on January 2, 2014, to the general public, emergency first responders, and shippers and carriers regarding the particular flammability of Bakken crude oil; and

WHEREAS, the Pipeline will carry a large volume of Bakken crude oil through residential areas in adjacent communities, which will place residents in harm's way should an explosion or spill occur; and

WHEREAS, according to PHMSA, pipeline operators reported 1,880 crude oil spills nationwide between 2003 and 2013, or nearly one spill every other day, resulting in over 44 million gallons of oil being spilled; and **WHEREAS**, 80 percent of these spills were the result of corrosion, equipment failure, incorrect operation or material and weld failures; and

WHEREAS, according to Public Employees for Environmental Responsibility, PHMSA only has 135 inspectors to oversee 2.6 million miles of pipeline, and only a fifth of that pipeline system has been inspected by PHMSA or its state partners since 2006; and

WHEREAS, any rupture or compromise of the Pipeline, even without an explosion or fire, will require extraordinary cleanup efforts, could force residents from their homes, and place a large number of residents in close proximity to hazardous materials; and

WHEREAS, most residents living near the proposed pipeline depend on ground water and public community water systems for potable water supplies, the integrity and safety of which may be jeopardized by the Pipeline; and
